FULL PAPERS

PAGE

Biosynthesis and Degradation

Palmitate activation and esterification in microsomal fractions of rat liver.
By K. A. Lloyd-Davies & D. N. Brindley 39

Purification and characterization of a collagenase extracted from rabbit tumours.
By P. A. McCroskery, J. F. Richards & E. D. Harris, Jr. 131

Initiation factors in protein synthesis by free and membrane-bound polyribosomes of liver and hepatoma.
By C. N. Murty, E. Verney & H. Sidransky 143

Bioenergetics

The thermochemical characterization of sodium dithionite, flavin mononucleotide, flavin–adenine dinucleotide and Methyl and Benzyl Viologens as low-potential reductants for biological systems.
By G. D. Watt & A. Burns 33

Chloride-dependent restoration of coupling by oligomycin in rat liver mitochondria.
By N. Ariel & Y. Avi-Dor 115

Subcellular Structures

Determination of the amount of small messenger ribonucleic acid-containing particles free in liver cytoplasm.
By B. M. Mullock & R. H. Hinton 51

Inhibition of leucocytic lysosomal enzymes by glycosaminoglycans *in vitro*.
By J. L. Avila & J. Convit 57

Basolateral plasma membranes of intestinal epithelial cells. Identification by lactoperoxidase-catalysed iodination and isolation after density perturbation with digitonin.
By B. A. Lewis, A. Elkin, R. H. Michell & R. Coleman 71

Cellular Interactions and Control Processes

The androgenic regulation of the activities of enzymes engaged in the synthesis of deoxyribonucleic acid in rat ventral prostate gland.
By P. S. Rennie, E. K. Symes & W. I. P. Mainwaring 1

PAGE

Induced transcription-dependent synthesis of mitochondrial reduced nicotinamide–adenine dinucleotide dehydrogenase in *Drosophila*.
By J. F. J. G. Koninkx 17

The contents of adenine nucleotides, phosphagens and some glycolytic intermediates in resting muscles from vertebrates and invertebrates.
By I. Beis & E. A. Newsholme 23

Regulation of ribonucleic acid synthesis by polyamines. Reversal by spermine of inhibition by methylglyoxal bis(guanylhydrazone) of ribonucleic acid synthesis and histone acetylation in rabbit heart.
By C. M. Caldarera, A. Casti, C. Guarnieri & G. Moruzzi 91

The effect of glucose and of potassium ions on the interconversion of the two forms of glycogen phosphorylase and of glycogen synthetase in isolated rat liver preparations.
By L. Hue, F. Bontemps & H.-G. Hers 105

Relationships between the exchange of calcium and phosphate in isolated fat-cells.
By B. R. Martin, T. Clausen & J. Gliemann 121

Development

The induction of enzyme activity in the endosperm of germinating castor-bean seeds.
By K. M. Marriott & D. H. Northcote 65

Cytochemical studies on alkaline phosphatase production during sporulation in *Bacillus subtilis*.
By A. R. Glenn & J. G. Coote 85

Metabolism in Whole Organisms

Tissue distribution of retinal and its metabolites after administration of double-labelled retinol.
By P. R. Sundaresan & G. M. Sundaresan 99

SHORT COMMUNICATIONS

PAGE

Biosynthesis and Degradation

Milk glucose as an index of the intracellular glucose concentration of rat mammary gland.
By N. J. Kuhn & A. White 153

PAGE

Subcellular Structures

Purification and characterization of guinea-pig intestinal brush borders.
By K.-J. Andersen, G. von der Lippe, L. Mørkrid & H. Schjønsby 157

Contents of Volume 152, No. 2

FULL PAPERS

PAGE

Biosynthesis and Degradation

The transfer of mannose to dolichol diphosphate oligosaccharides in pig liver endoplasmic reticulum.
By G. J. A. Oliver & F. W. Hemming 191

Polyphasic changes in incorporation of precursors into ribonucleic acid of oestradiol-stimulated mammary gland.
By F. Auricchio, R. Satriano, A. Rotondi, A. Quirino & F. Bresciani 211

The kinetics of incorporation *in vivo* of [^{14}C]acetate and [^{14}C]carbon dioxide into the fatty acids of glycerolipids in developing leaves.
By C. R. Slack & P. G. Roughan 217

The microbial metabolism of acetophenone. Metabolism of acetophenone and some chloroacetophenones by an *Arthrobacter* species.
By R. E. Cripps 233

Glycoprotein catabolism in rat liver. Lysosomal digestion of iodinated asialo-fetuin.
By J. H. Labadie, K. P. Chapman & N. N. Aronson, Jr. 271

Biosynthesis and hydrolysis of cholesteryl esters by rat skin subcellular fractions. Regulation by prostaglandins.
By V. A. Ziboh & M. A. Dreize 281

Studies on the glycosylation of hydroxylysine residues during collagen biosynthesis and the subcellular localization of collagen galactosyltransferase and collagen glucosyltransferase in tendon and cartilage cells.
By R. Harwood, M. E. Grant & D. S. Jackson 291

Mode of formation of cholesta-5,7-dien-3β-ol from cholest-5-en-3β-ol by larvae of *Calliphora erythrocephala*.
By P. Johnson, I. F. Cook, H. H. Rees & T. W. Goodwin 303

PAGE

Inhibition of fatty acid synthesis and stimulation of glycogen breakdown by vasopressin in the perfused mouse liver.
By G. Y. Ma & D. A. Hems 389

The measurement of protein turnover by density labelling.
By A. Boudet, T. J. Humphrey & D. D. Davies 409

Bioenergetics

The action of tributyltin on energy coupling in coupling-factor-deficient submitochondrial particles.
By A. P. Dawson & M. J. Selwyn 333

The microbial metabolism of C_1 compounds. The electron-transport chain of *Pseudomonas* AM1.
By D. Widdowson & C. Anthony 349

Subcellular Structures

The permeability to calcium of pigeon erythrocyte 'ghosts' studied by using the calcium-activated luminescent protein, obelin.
By A. K. Campbell & R. L. Dormer 255

Reconstitution of pig lymphocyte plasma membranes from solubilized components, with particular reference to membrane-associated immunoglobulins.
By S. I. Chavin & A. Holliman 267

Enzymic iodination of eukaryotic ribosomal subunits. Characterization and analysis by two-dimensional gel electrophoresis.
By D. P. Leader 373

Cellular Interactions and Control Processes

Enzymic hydrolysis of acetylcarnitine in liver from rats, sheep and cows.
By N. D. Costa & A. M. Snoswell 161

PAGE

Acetyl-coenzyme A hydrolase, an artifact? The conversion of acetyl-coenzyme A into acetate by the combined action of carnitine acetyltransferase and acetylcarnitine hydrolase.
By N. D. Costa & A. M. Snoswell 167

Creatine kinase equilibrium and lactate content compared with muscle pH in tissue samples obtained after isometric exercise.
By K. Sahlin, R. C. Harris & E. Hultman 173

Effects of cholecalciferol on the translocation of calcium by non-everted ileum *in vitro*.
By E. S. Holdsworth, J. E. Jordan & E. Keenan 181

4-Aminobutyrate in mammalian putrescine catabolism.
By N. Seiler & B. Eichentopf 201

Folate metabolism in the rat liver during regeneration after partial hepatectomy.
By B. Barbiroli, C. Bovina, B. Tolomelli & M. Marchetti 229

Analysis of enzyme induction in bacteria.
By R. Young & H. Bremer 243

Phosphatidate phosphohydrolase and palmitoyl-coenzyme A hydrolase in cardiac subcellular fractions of hyperthyroid rabbits and cardiomyopathic hamsters.
By K. J. Kako & S. D. Patterson 313

Precocious development of glucuronidating and hydroxylating enzymes in chick embryos treated with pituitary grafts.
By G. J. Wishart & G. J. Dutton 325

PAGE

Evidence for the coupling of biosynthesis and secretion of serum albumin in the rat. The effect of colchicine on albumin production.
By P. R. Dorling, P. S. Quinn & J. D. Judah 341

Treatment of immature mice with gonadotrophins. The influence of mouse age on the response of ovarian alkaline phosphatase activities to gonadotrophins.
By T. A. Bramley 365

Regulation of mitochondrial protein turnover by thyroid hormone(s).
By M. S. Rajwade, S. S. Katyare, P. Fatterpaker & A. Sreenivasan 379

Gluconeogenesis by isolated guinea-pig liver parenchymal cells.
By I. J. Arinze & D. L. Rowley 393

The activity of phosphoenolpyruvate carboxykinase in rat tissues. Assay techniques and effects of dietary and hormonal changes.
By C. I. Pogson & S. A. Smith 401

Metabolism in Whole Organisms

A difference in the incorporation of ^{14}C into hippurate glycine from DL-[2-^{14}C]glutamate and DL-[5-^{14}C]glutamate in guinea pigs.
By K. V. Rowsell, T. A. J. Ali & E. V. Rowsell 357

The calculation of errors and the choice of sampling times in the determination of irreversible disposal rates *in vivo* by isotope experiments.
By D. F. Heath & V. J. Cunningham 417

SHORT COMMUNICATIONS

PAGE

Cellular Interactions and Control Processes

Acute effects of carbon monoxide on the metabolism of perfused rat liver.
By D. L. Topping 425

The release of 3′:5′-cyclic monophosphate from the isolated perfused rat heart.
By J. A. O'Brien & R. C. Strange 429

PAGE

Development

Changes in lectin-induced deoxyribonucleic acid synthesis in cultures of chick-embryo fibroblasts at various stages of development.
By R. Roguet & R. Bourrillon 421

Contents of Volume 152, No. 3

FULL PAPERS

PAGE

Biosynthesis and Degradation

Some aspects of fatty acid oxidation in isolated fat-cell mitochondria from rat.
By R. D. Harper & E. D. Saggerson 485

Elongation of fatty acids by microsomal fractions from the brain of the developing rat.
By P. J. Brophy & D. E. Vance 495

Carbon-13 nuclear-magnetic-resonance spectroscopy of whole cells and of cytochrome *c* from *Neurospora crassa* grown with [*S*-*Me*-^{13}C]-methionine.
By R. T. Eakin, L. O. Morgan & N. A. Matwiyoff 529

The biosynthesis of alginic acid by *Azotobacter vinelandii*.
By D. F. Pindar & C. Bucke 697

Bioenergetics

Effects of sulphate-limited growth in continuous culture on the electron-transport chain and energy conservation in *Escherichia coli* K12.
By R. K. Poole & B. A. Haddock 537

Proton translocation and the respiratory nitrate reductase of *Escherichia coli*.
By P. B. Garland, J. A. Downie & B. A. Haddock 547

The activation of non-phosphorylating electron transport by adenine nucleotides in Jerusalem-artichoke (*Helianthus tuberosus*) mitochondria.
By R. Sotthibandhu & J. M. Palmer 637

Succinate uptake and related proton movements in *Escherichia coli* K12.
By S. J. Gutowski & H. Rosenberg 647

Functional anaerobic electron transport linked to the reduction of nitrate and fumarate in membranes from *Escherichia coli* as demonstrated by quenching of atebrin fluorescence.
By B. A. Haddock & M. W. Kendall-Tobias 655

Subcellular Structures

Subcellular localization of γ-aminobutyrate transaminase and glutamate dehydrogenase in adult rat brain. Evidence for at least two small glutamate compartments in brain.
By G. L. A. Reijnierse, H. Veldstra & C. J. Van den Berg 469

PAGE

Short-chain fatty acid synthases in brain. Subcellular localization and changes during development.
By G. L. A. Reijnierse, H. Veldstra & C. J. Van den Berg 477

Studies of the cell surface of *Paramecium*. Ciliary membrane proteins and immobilization antigens.
By H. G. Hansma & C. Kung 523

Subcellular structure of bovine thyroid gland. A study on bovine thyroid membranes by buoyant-density-gradient centrifugation in a B-XIV zonal rotor.
By H. J. J. Hilderson, M. J. S. De Wolf, A. R. Lagrou & W. S. H. Dierick 601

Changes in cellular composition during magnesium deficiency.
By G. A. George & F. W. Heaton 609

Characterization of the terminal stages of chlorophyll(ide) synthesis in etioplast membrane preparations.
By W. T. Griffiths 623

Adenosine deaminase of cultured brain cells.
By E. G. Trams & C. J. Lauter 681

Cellular Interactions and Control Processes

Hormonal control of luteal 20α-hydroxy steroid dehydrogenase and Δ^5-3β-hydroxy steroid dehydrogenase during luteolysis in pregnant rat.
By R. G. Rodway & N. J. Kuhn 433

Luteal 20α-hydroxy steroid dehydrogenase and the formation of Δ^4-3-oxo steroids in the rat after weaning or treatment with 2-bromo-α-ergocryptine during lactation.
By R. G. Rodway & N. J. Kuhn 445

The effect of convulsions induced by flurothyl on ribonucleic acid synthesis in rat cerebral cortex during the recovery phase.
By C. V. A. Wynter, P. Ioannou & A. P. Mathias 449

Inhibition of leucyl-transfer ribonucleic acid synthetase in *Bacillus subtilis* by granaticin.
By A. Ogilvie, K. Wiebauer & W. Kersten 511

Stringent control of ribonucleic acid synthesis in *Bacillus subtilis* treated with granaticin.
By A. Ogilvie, K. Wiebauer & W. Kersten 517

PAGE

The pentose cycle and insulin release in isolated mouse pancreatic islets during starvation.
By C. J. Hedeskov & K. Capito 571

Adenosine 3′:5′-cyclic monophosphate-dependent protein kinase in brown fat from newborn rabbits. Changes in the binding of adenosine 3′:5′-cyclic monophosphate after preincubation of the tissue with noradrenaline or incubation of the enzyme with adenosine triphosphate.
By B. L. Knight 577

Growth hormone, cyclic nucleotides and the rapid control of translation in heart muscle.
By J. Mowbray, J. A. Davies, D. J. Bates & C. J. Jones 583

Effect of adenosine on the adenine nucleotide content and metabolism of hepatocytes.
By P. Lund, N. W. Cornell & H. A. Krebs 593

The metabolism of lipids in mouse pancreatic islets. The oxidation of fatty acids and ketone bodies.
By C. Berne 661

The metabolism of lipids in mouse pancreatic islets. The biosynthesis of triacylglycerols and phospholipids.
By C. Berne 667

PAGE

The dexamethasone receptor in the Novikoff hepatoma. Characterization and changes in concentration and nuclear uptake during glucocorticoid therapy.
By S.-L. H. Liu, D. J. McNamara & T. E. Webb 689

Development

Biochemical evidence for the reversed polarity of the outer membrane of the bacterial forespore.
By B. J. Wilkinson, J. A. Deans & D. J. Ellar 561

Enzymes of glycerolipid synthesis in small-intestinal mucosa of foetal and neonatal guinea pigs.
By V. J. Short, R. Dils & D. N. Brindley 675

Metabolism in Whole Organisms

Myofibrillar protein turnover and urinary N^{τ}-methylhistidine output. Response to dietary supply of protein and energy.
By L. N. Haverberg, L. Deckelbaum, C. Bilmazes, H. N. Munro & V. R. Young 503

SHORT COMMUNICATIONS

PAGE

Biosynthesis and Degradation

An investigation of the location and possible compartmentation of the precursor pool of phenylalanine for protein synthesis in human granulocytes.
By M. J. Blackburn, T. M. Andrews & R. W. E. Watts 697

Relation of C-6 glial cells in culture to myelin.
By J. J. Volpe, K. Fujimoto, J. C. Marasa & H. C. Agrawal 701

Dimethylnitrosamine demethylation by reconstituted liver microsomal cytochrome *P*-450 enzyme system.
By P. D. Lotlikar, W. J. Baldy, Jr. & E. N. Dwyer 705

PAGE

Cellular Interactions and Control Processes

Role of cytosolic rat liver aldehyde dehydrogenase in the oxidation of acetaldehyde during ethanol metabolism *in vivo*.
By C. J. P. Eriksson, M. Marselos & T. Koivula 709

Evidence against participation of the γ-glutamyltransferase – γ-glutamylcyclotransferase pathway in amino acid transport by rabbit erythrocytes.
By J. D. Young, J. C. Ellory & P. C. Wright 713

Colchicine inhibition of the heparin-stimulated release of clearing-factor lipase from isolated fat-cells.
By A. Cryer, A. McDonald, E. R. Williams & D. S. Robinson 717
